arm Tour Itiner

st overnight stop.

This type of tour was started
me 20 years ago by First Se-
tity. "We felt that in order
compete successfully, the
mers and ranchers of our
a had to learn first-hand a-
ut new improved methods of
eration being employed in
er parts of the country," Mr.
omas noted.

EVERY TOUR WE HAVE
ken has proved very success-
and many of the people
ned up for this year's tour
repeat customers. I firmly
ieve the tour we have plan-
l this year will be the best
all," he said.

Tour highlights include:

— Oak Meadows Ranch, Clay-
ifornia, established three
erations ago by the Hamil-
nily — site of one of Califor-
nia's first registered Hereford
ds.

—Ken Lane Hampshire sheep
eration. Located in the Lock-

ford area, Mr. Lane has develop-
ed a high quality flock and
good commercial cattle.

— Lewallen Ranch, Linden
California. John Lewallen is
noted for his development of
very heavy weaning weights in
registered Polled Herefords.

— Rudd Manufacturing Com-
pany, Ripon, California, noted
for very successful design of
agricultural equipment, includ-
ing enclosures for herringbone
milking parlors and sophistica-
ted feed-handling equipment.

— Tannehill Cattle Company,
Salinas, California. Here tour
participants will see some of
the more exotic cattle, includ-
ing Santa Gertrudis bulls, and
Simmental and Limousin ani-
mals.

—Double J Ranch, near Sal-
inas. Double J is the home of
Doc Bar, one of the world's
notable sires of performance
quarter horses.
